

Third South American Colloquium on Visible Light Communications

November 11-12, 2023

In recent years, there has been a growing research and development in the field of Visible Light Communications, within the academy, as well as in the industry at a global level.

The development of this type of technology is not only based on lighting, but also on data communications, localization and detection, operating in unlicensed bands. In this way, this support offers wide bandwidth, intrinsic safety and robustness to interference that are complementary to radiofrequency-based technologies, particularly in emerging 5G wireless communications.

However, the widespread deployment of visible light communications has not yet been realized and today faces a series of challenges such as integration with existing networks, LEDs with switching functionality, protocols, weather effects in environments, safety regulation and device performance.

The Third South American Colloquium on Visible Light Communications aims to bring together researchers, software and hardware developers, and will be held on November 11-12, 2023. The conference has invited this year the top international speakers, Dr. Zabih Ghassemlooy (Northumbria University, United Kingdom). In this context, the call for papers is open to present, share and discuss recent and novel ideas related with this research field.

INVITED KEYNOTE SPEAKERS

Fary Ghassemlooy

Northumbria University, United Kingdom.

Title: Organic LED based Visible Light Communications

Rafael Pérez Jiménez

Universidad de Las Palmas de Gran Canaria, Director IDeTIC, Spain,

Title: Trends on OCC sistemas for IoT applications

Stanislav Zvánovec

Czech Technical University in Prague

Title: Relaying schemes in VLC systems

Rui Wang

Department of Information and Communication, Tongji University Shanghai, China

Title: 6G

PUBLICATION

All accepted papers will be included in the conference proceedings and will be indexed in IEEExplore. For each accepted paper, at least one author must register for the conference and present the paper.

THEMES DISCUSSED (but Not limited to)

Optical Networks

- AI and ML for optical systems and networks
- Big data driven optical networking
- Data analytics for optical networks
- Elastic, flexible rate and flexi-grid optical networks
- Free-space optical networks
- Optical network control and management
- Optical network survivability and availability
- Optical vehicular networks
- Optical and wireless convergence
- Routing and spectrum assignment for optical networks
- Software defined optical networks
- Ultraviolet communications and networks
- Underwater optical communications
- Virtualization and slicing in optical networks
- Visible light communications

Mobile and Wireless Networking

- Cellular systems, 4G/5G/B5G/6G
- Cognitive radio networks
- Device-to-device/machine-to-machine communications
- Green wireless networks
- Large-scale LEO satellite networking
- Opportunistic wireless networks
- Pervasive and wearable computing and networking
- Reconfigurable wireless networks
- Software-defined wireless networks
- Underwater wireless networks
- Vehicular networks
- UAV
- Wireless network virtualization
- Wireless multimedia networks
- WLAN, WPAN, and other home/personal networking technologies
- Wireless networking techniques based on AI

Communication Services, Software and Multimedia Applications

- Cooperative networking for streaming media content
- E-health, E-governance, E-agriculture, etc.
- High quality service provisioning for multimedia applications
- Location-based services
- ML techniques for video delivery and service
- ML techniques for multimedia content analysis
- Multimedia cloud, streaming, multicast and broadcast services
- Multimedia fog/edge computing and communication
- QoE and QoS
- Quality-oriented routing algorithms
- Real time communication services
- Service orchestration and management
- Service security and privacy
- Triple and quadruple play services

Communications Theory & Signal Processing

- Communication theory of ad-hoc and sensor networks
- Communication theory of distributed and edge computing
- Communication theory of networks and cross-layer design
- Multi-antenna, multi-user and multi-node systems
- Radio communications
- Satellite & space communications
- Signal processing techniques in 5G/B5G/6G
- Signal processing for QoS and QoE based applications
- Signal processing for smart grid and green communications
- Signal processing for sensor networks and IoT
- Signal processing for software defined and cognitive radio
- Signal processing for power line communications
- Signal processing for millimeter and tera-Hz communication
- Theoretical aspects of blockchain and ML in networks

Next-generation Networking and Internet

- 5G/B5G/6G architecture
- Blockchain in next generation communications and networks
- Content-centric networking
- Centralized-RAN and Cloud-RAN architectures
- Future Internet and next-generation networking architectures

- High speed architectures for next generation routers/switches
- Management of service-oriented control plane in 5G/B5G
- Network functions virtualization
- Next-generation access networks
- Next-generation anomaly-intrusion-attack detection/prevention
- Next-generation flow management
- Next-generation IP multimedia subsystem
- Next-generation network management and control
- Parallel architectures for next generation routers/switches
- Software-defined networking

AI, Big Data and ML for Networking

- AI and ML for 5G/B5G/6G and network slicing
- AI and ML for virtualized and software-defined networks
- AI, neural networks, and deep learning for network management
- Big data for smart cities and smart homes
- Big data for cloud computing and networking
- Big data for communications and networking
- Big data for smart grids
- Big data with IoT and cyber-physical systems
- Cloud and network data analytics, modelling and visualization
- Cooperative learning for software-defined and virtualized networks
- Data analytics for QoS and traffic classification
- Data analytics for faults and root-cause analysis
- Data-driven management of virtualized infrastructure
- Data-driven management of IoT and cyber-physical systems
- Data-driven management of SDN and data centers
- ML based distributed training and learning over-the-air
- Operational analytics and intelligence
- Predictive analytics and real-time analytics

Selected Areas in Communications

- Blockchain in communications and networks
- Cloud, fog and edge computing
- Internet-of-Things
- Smart cities and urban computing
- Smart grid communications
- Social networks, crowdsourcing, and crowdsensing

- Tactile Internet- History of VLC
- VLC in popular culture

HOW TO SEND A PAPER

Authors are invited to submit papers in English language with a maximum length of six pages.

https://conferences.ieee.org/conferences_events/conferences/conferencedetails/53127.

The deadline for submission is July 16, 2023. IEEE Transactions templates for Microsoft Word or LaTeX formats can be found at <https://www.ieee.org/conferences/publishing/templates.html>

Only PDF files will be accepted as a valid submission to start the review process and should be submitted to the EDAS website <https://edas.info/>, by logging in or creating a new account.

IMPORTANT DATES

Deadline for submission	July 16, 2023
Notification of acceptance	August 16, 2023
Camera ready paper	September 30, 2023

SCIENTIFIC COMMITTEE

Organizing Committee

- Dr. Zabih Ghassemlooy, Northumbria University, UK.
- Dr. Ismael Soto, Universidad de Santiago de Chile, Chile.
- Dr. Edson T. Camargo, Federal University of Technology of Paraná, Brazil.
- Dr. Paulo de Tarso Neves Junior, Federal University of Technology of Paraná, Brazil.
- Dr. Sebastian Gutierrez, Universidad de Santiago de Chile, Chile.
- Dr. Pablo Adasme, Universidad de Santiago de Chile, Chile.

INTERNATIONAL TECHNICAL COMMITTEE

- Dr. Rolando Carrasco, Newcastle University, UK.
- Dr. Richard Demo Souza, Federal University of Santa Catarina, Brazil.
- Dr. Evelio M. Garcia Fernandez, Federal University of Parana, Brazil.
- Dr. Samuel Baraldi Mafra, National Institute of Telecommunications, Brazil.

- Dr. Hirley Alves, University of Oulu, Finland.
- Dr. Diego Fuentealba, Universidad Técnica Metropolitana de Chile (UTEM), Chile.
- Dr. Daniel Iturralde, Universidad del Azuay, Ecuador.
- Dr. Ali Dehghanfirouzabadi, Universidad de Santiago de Chile, Chile.
- Dr. Salman Khan, University of Engineering and Technology, Pakistan.
- Dr. Ivan Jiron Araya, Universidad Católica del Norte, Chile.
- Dr. Bartolomeu Uchôa-Filho, Federal University of Santa Catarina, Brazil.
- Dr. Bruno Fontana da Silva, Federal University of Santa Catarina, Brasil.
- Dr. Jinsong Wu, Universidad de Chile, Chile.
- Dr. Claudio Estevez, Universidad de Chile, Chile.
- Dr. Kyesan Lee, Kyung Hee University, Korea.
- Dr. Kyujin Lee, Semyung University, Korea.
- Dr. Shaharyar Kamal, Kyung Hee University, Korea.
- Dr. Changping Li, Yangzhou University, China.
- Dr. Xuan Tang, Chinese Academy of Sciences, Fujian, China.
- Dr. Stanislav Zvanovec, Czech Technical University in Prague, Czech Republic.
- Dr. Ali Khalighi, Ecole Centrale Marseille-Institut Fresnel, France.
- Dr. Thomas Kamalakis, Harokopio University, Greece.
- Dr. Luis Nero Alves, Instituto de Telecomunicações, Portugal.
- Dr. Rafael Perez Jimenez, Universidad de las Palmas de Gran Canaria, Spain.
- Dr. Min Zhang, Beijing University of Posts and Telecommunications, China.
- Dr. Hsin-Mu (Michael) Tsai, National Taiwan University, Taiwan
- Dr. Gholamreza Baghersalimi, University of Guilan, Iran.
- Dr. Anna Maris, Roma Tre University, Italy.
- Dr. Anh T. Pham, The University of AIZU, Japan.
- Dr. Yeon-Ho Chung, Pukyong National University, Busan, Korea.
- Dr. Martin Luna, Universidad Autónoma de San Luis Potosí, Mexico.
